

Pavle Randelović was born on July 6, 1980, in Zuara (Libya). After graduating at the Faculty of Medicine, University of Niš (2006), he received his Ph.D. in Molecular medicine (2013) at the same Faculty. He worked as a researcher and teaching assistant at the Department of Physiology at mentioned Faculty, and currently, he holds the position of Assistant Professor.

Previous work of dr. Randelović was in the field of physiology and pathophysiology of kidney and nephrotoxicity. He also worked in the field of toxicology in animal models. In the last few years, his research interest has included biologically active natural products. He works mostly on preclinical models of diseases with animals, isolated organs and cell cultures.

He is very skilled in practical work in laboratory setting dealing with animals or cell culture. He has great experience in design of the study as well as in statistical methods for evaluating results and finally publishing it as an article.

Dr. Randelović is an author or co-author in 60 papers in international peer-reviewed journals, as well as in more than 20 presentations at international and national conferences and symposia. His research work has received 405 citations (without self-citation) and his *h* index is currently 14 (according to SCOPUS database accessed on 09/07/2020).
